## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 85-95 and 100-104, drawn to an interface for assisting a user with parking a vehicle, classified in class 345, subclass 764.
- II. Claims 96-99, drawn to a system for assisting a user in parking a vehicle, classified in class 318, subclass 587.

The inventions are distinct, each from the other because of the following reasons:

Group I presents a system for parking a vehicle including an interface for defining a parking space, a processor for determining parking parameters, a display for showing a simulation of parking, and a mechanism for controlling components of the vehicle to enable parking, all centered around an interface for assisting a user. Group II presents a training mode activated by a user that registers coordinated operations of components of a vehicle in driving the vehicle to a desired parking space, and causing vehicle components to carry out the registered, coordinated operations to drive the vehicle to the determined parking space, all centered around the training mode system to assist the user.
